

## Financial Tear Sheet

### Corporate Profile

BeiGene is a commercial-stage biopharmaceutical company rooted in China that is dedicated to becoming a global leader in the discovery, development and commercialization of innovative, molecularly targeted and immuno-oncology drugs for the treatment of cancer.

We have three internally-developed late-stage clinical drug candidates:

- Zanubrutinib (BGB-3111) — an investigational small molecule inhibitor of Bruton’s tyrosine kinase, or BTK, that is currently being evaluated in a broad registrational clinical program globally and in China as a monotherapy and in combination with other therapies to treat various lymphomas;
- Tislelizumab (BGB-A317) — an investigational humanized monoclonal antibody against the immune checkpoint receptor PD-1 that is currently being evaluated in a broad registrational clinical program globally and in China, as a monotherapy and in combination with other therapies to treat various solid and hematological cancers; and
- Pamiparib (BGB-290) — an investigational small molecule inhibitor of PARP1 and PARP2 that is being evaluated as a potential monotherapy and in combinations for various solid tumors. It is currently in a pivotal clinical trial in China and is expected to enter late-stage development globally in 2018.

In 2017, we entered into a strategic collaboration with Celgene Corporation, or Celgene, in which we granted Celgene exclusive rights to develop and commercialize tislelizumab for solid tumors in the United States, Europe, Japan, and the rest of the world outside of Asia. We retained rights to tislelizumab for solid tumors in Asia (ex-Japan) and for hematological malignancies and

internal combinations globally.

In addition, Celgene granted us an exclusive license to market its approved cancer therapies ABRAXANE®, REVLIMID®, and VIDAZA® in China excluding Hong Kong, Macau and Taiwan, and also transferred its commercial operations and personnel in China to us, which has allowed us to generate product revenue in China since September 2017 and which we expect to expand in preparation for the potential launch of our own internally developed drug candidates and our other in-licensed drug candidates in China.

As of January 1, 2018, we have a global team of over 850 employees, including more than 400 scientists and clinicians, in China, the United States and Australia. Our offices are located in Beijing; Shanghai; Cambridge, MA; Fort Lee, NJ; and the San Francisco Bay Area, CA; including a research and development center in Beijing, manufacturing sites in Suzhou and Guangzhou, and commercial operations in Shanghai.
